

Embed problem solving and reasoning and deepen subject knowledge across your school

How can we develop mastery following the Numicon approach?

In this FREE half-day workshop we will explore how *Numicon* offers a consistent teaching and learning approach centred around three guiding principles: communicating mathematically, generalizing, and exploring relationships, that allows children to understand, confidently explore and master abstract concepts.

With research-based resources and rigorous teaching support from nursery to Year 6, the *Numicon* approach enables all teachers to teach the higher expectations of the 2014 National Curriculum with confidence.

The afternoon will include an introduction and overview of the *Numicon* approach, exploring a *Numicon* lesson and looking at how the programme works across the year groups. All attendees will go away with a free sample lesson to take back and try in their school.

- 1.00–1.30pm – Registration and welcome
- 3.30pm – Finish

Free sample lesson to take away

Date and time:	Thursday 29th June 2017 13:30-15:30 (registration from 13:00)
